

Nome	BioRad QX200 Droplet Reader
Descrizione	 The image shows the BioRad QX200 Droplet Reader, a compact laboratory instrument used for high-throughput analysis of droplets. It consists of a main grey and white unit with a prominent green circular well on top, and a smaller, matching green and white component placed to its right. The main unit has a textured top surface and a small display or control area on its front face.
